- Teamwork

ABOUT ME

Motivated and detail-oriented Full-Stack Developer with hands-on experience in building responsive web applications using React, Node.js, Express.js, and MongoDB. Skilled in designing RESTful APIs, implementing authentication, and managing state in modern frontend frameworks. Strong problem-solving ability with a focus on clean code, efficient data handling, and unique UI designs. Seeking an opportunity to contribute technical expertise and creativity to a dynamic development team.

PROJECTS

MOVIX ⧉
Frontend Project

Developed a user-friendly e-commerce website using React, Redux and SCSS. Implemented responsive design, filtering, sorting, and personalized recommendations. Successfully integrated searchbar, wishlist functionality, and fancy UI. Completed the project individually within 4 days.

PING-UP ⧉
Chat Application

A dynamic and scalable web application built using the MERN stack with Redux for robust state management, deployed on Vercel. Designed to demonstrate seamless interaction between front-end components and backend services, it's a showcase of modern full-stack development.

CAR RENTAL ⧉
Ride Booking Application

This application showcases an end-to-end implementation of a real-world rental platform— from front-end UI to backend logic and deployment. Built with scalability, user experience, and security in mind, it's perfect for demonstrating full stack proficiency in a MERN environment.

PHARMEASY ⧉
E-Commerce Application

Collaborated within a team to develop a user-friendly e-commerce website using web technologies. Implemented responsive design, filtering, sorting, and personalized recommendations. Successfully integrated shopping cart, payment integration, wishlist functionality, and user detail management Contributed to creating engaging user interfaces and effectively worked as a team.
